

GOKUL P

Computer Science Engineering Graduate | Full Stack Development, Security & Enterprise Systems

Chennai, Tamil Nadu, India | gokul.p0807@gmail.com | +91 97914 52673 | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience across full-stack web development, secure authentication systems, and enterprise resource planning, built through five independent projects and four structured internships. Proficient in Python, Flask, JavaScript, REST API design, and relational database modeling, with practical exposure to role-based access control, encryption, multi-tenant architecture, and AI integration. Comfortable across the full development lifecycle — architecture, implementation, testing, and deployment. Open to entry-level roles across Software Development, Web Development, QA/Application Support, and SAP/ERP tracks, in both startups and established companies.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++
Web & Backend: Flask, REST API design, HTML, CSS, PHP, Gunicorn
Databases: MySQL, SQLite — relational schema design, query validation, data integrity
Enterprise & Architecture: Multi-tenant system design, role-based access control (RBAC), SAP/ERP fundamentals, business process modeling
Security: AES encryption, DWT steganography, multi-factor authentication design, secure file workflows
Cloud & DevOps: Oracle Cloud Infrastructure (OCI) — Certified Foundations Associate, Docker, Git/GitHub
Testing & QA: Manual functional testing, regression testing, defect identification and reporting, SDLC practices
Tools: Docker, XAMPP, Figma, OpenCV, Adobe Photoshop, Adobe Premiere Pro

FLAGSHIP PROJECTS

ERPilot AI — Multi-Tenant Enterprise Resource Planning SaaS Platform Mar 2026 – Jun 2026

Python, Flask, SQLite, Docker, Gemini API | github.com/lamgokul7/ERPilot-AI

- Architected and built a complete, AI-powered ERP SaaS platform end-to-end, covering employee management (HR), inventory tracking (Materials Management), supplier management, sales order processing (Sales & Distribution), notifications, and business reporting — directly analogous to core SAP HCM, MM, and SD module functions.
- Implemented multi-tenant architecture with tenant_id-based data isolation across a 7-table relational schema, securely supporting unlimited tenants on a single deployment.
- Built role-based access control (RBAC) and authentication workflows from first principles, defining permission tiers across all 7 functional modules.
- Designed and implemented REST-based backend modules in Flask for every core business function, and manually tested API endpoints across iterations to identify and resolve access-control and data-integrity defects before each release.
- Integrated the Gemini API to power a context-aware AI assistant for business queries and insights, with logging for every AI interaction.
- Containerized the full application with Docker and configured a production-ready deployment path using Gunicorn.

Graphical Password Authentication with Data Hiding — Final Year Project Jan 2025 – May 2025

Python, Flask, OpenCV, AES Encryption, DWT Steganography, SQLite | github.com/lamgokul7/Graphical-Password-Authentication-With-Data-Hiding

- Engineered a 3-factor authentication framework combining username/password validation, graphical image verification, and PIN-based authentication to strengthen user security.
- Implemented AES encryption for secure file protection and integrated DWT-based steganography for hidden data embedding and secure information sharing.
- Designed secure file upload, access-approval, and file-sharing workflows to improve confidentiality and access control mechanisms.
- Built a full-stack web application integrating authentication modules, encrypted storage, image processing, and database-driven user management.
- Tested the full authentication flow across valid, invalid, and boundary input cases, and verified encryption/decryption integrity across repeated test cycles to confirm no data loss or corruption.

OTHER PROJECTS

Real Estate Management System — Team Project Apr 2024 – May 2024

HTML, CSS, JavaScript, PHP, MySQL, XAMPP | github.com/lamgokul7/Real-Estate-Management-System

- Built a full property management platform supporting listings, search/filtering, bookings, and inquiry workflows, backed by a normalized MySQL schema.

- Developed admin modules for managing properties, feedback, and transaction records, with responsive interfaces across devices.

INTERNSHIP EXPERIENCE

Android App Development Intern — Ajashia Technologies • Built Android features using Java and Kotlin, integrating Firebase backend services into application workflows. • Took part in design, testing, and debugging cycles, gaining direct exposure to mobile SDLC practices.	Feb 2025 – May 2025
Frontend Web Development Intern — Motion Cut • Built responsive web interfaces in HTML/CSS validated across desktop and mobile breakpoints. • Designed UI layouts in Figma, then implemented them as functioning frontend components.	Jan 2025 – Feb 2025
Skill Up Program Intern — Mitsogo Technologies • Contributed to wireframing, prototyping, and frontend implementation using HTML, CSS, and JavaScript within a collaborative team workflow.	Jul 2024 – Aug 2024
Web Design Intern — Codebind Technologies • Designed and built responsive website layouts, focusing on cross-device usability and accessibility.	Jul 2023 – Aug 2023

EDUCATION

Bachelor of Engineering, Computer Science and Engineering Anand Institute of Higher Technology CGPA: 7.84 / 10.00	Nov 2021 – May 2025
Higher Secondary Certificate (XII) — A.V.Rm.V Matric Higher Secondary School Score: 81.93%	Jun 2020 – May 2021
Secondary School Certificate (X) — A.V.Rm.V Matric Higher Secondary School Score: 71.6%	Jun 2018 – May 2019

CERTIFICATIONS

- Oracle Cloud Infrastructure 2023 Certified Foundations Associate — Oracle (Apr 2024)
- Journey to Cloud: Envisioning Your Solution — IBM SkillsBuild (Sep 2024)
- MongoDB Node.js Developer Path for SmartBridge — MongoDB (Sep 2024)
- Networking Essentials — Cisco Networking Academy (May 2023)
- Learn Figma: UI/UX Design Masterclass — Udemy (Nov 2024)
